

**DELAWARE RIVER BASIN COMMISSION**  
**APPLICATION STATUS PAGE**  
**AS OF SEPTEMBER 15, 2006**

Anticipated Commission Meeting (subject to change - refer to hearing notice)	Project Lead	Docket No.	Applicant	Project Description (As NAR'd - descriptions may change for the hearing notice)	Municipality	County	State	State Regional Office	Located in GWPA?	Located in SPW? (Upper, Middle or Lower)	Type of Renewal or New Project	Type of Project	Type of Water Supply	Items Needed From Applicant	Items Needed From State	Date Application Received	Date of NAR
9/27/2006	AS	D-1981-078 CP-5	Matamoras Municipal Authority	An application to replace the withdrawal of water from Well No. 8 in the applicant's public water supply distribution system with a withdrawal from Well No. 8A, because Well No. 8 has become an unreliable source of supply. The applicant requests that the maximum total withdrawal from all wells remain unchanged, at 11.7 mg/30 days. The replacement well is located in the Pleistocene Outwash Formation in the Delaware River Watershed in Matamoras Borough, Pike County, Pennsylvania.	Matamoras Borough	Pike	PA	NE	No	Yes - Upper	A	GWWD	Public		State approval - DRBC to act first.	4/12/2006	6/21/2006
9/27/2006	PS	D-1986-038 CP-2	Reading Regional Airport Authority	An application to upgrade and expand an existing 0.175 mgd secondary WWTP to 0.42 mgd. The project is located at the western end of the existing WWTP site off Leisch's Bridge Road between Reading Regional Airport and the Schuylkill River in Bern Township, Berks County Pennsylvania. The project service area includes the Reading Regional Airport and associated development, the West Shore area, the Water District area and the Saint Joseph Medical Center area, all in Bern Township. Much of the existing plant will be replaced by new treatment facilities which includes Sequencing Batch Reactors biological processing, aerobic sludge digesters and gas chlorination prior to discharge to the Schuylkill River at the existing discharge point. Please note the docket number change. A Notice of Application Received was issued for this application on April 2, 2004 under D-2004-16.	Bern Township	Berks	PA	SC	No	No	B	WWTP	N/A			2/27/2004	4/2/2004
9/27/2006	PS	D-1987-045 CP-2	Antietam Valley Municipal Authority	An application to modify a 1.225 mgd WWTP to more effectively process hydraulic surges due to wet weather-related infiltration and inflow (I&I) to the collection system. The WWTP will continue to serve predominantly residential portions of St. Lawrence Borough, Mount Penn Borough, Exeter and Lower Alsace Township, all within Berks County, Pennsylvania. The WWTP is located on Butter Lane in St. Lawrence Borough just east of the intersection of State Route 562 and U.S. Route 422. The WWTP will continue to discharge to Antietam Creek in the Schuylkill River Watershed through the existing outfall. No increase in treatment capacity is proposed, as the docket holder will continue its efforts to control I & I.	St. Lawrence Borough	Berks	PA	SC	No	No	B	WWTP	N/A			2/2/2006	3/30/2006
9/27/2006	PS	D-1988-054-3	Waste Management Disposal Services of Pennsylvania, Inc.	Modify a landfill LTP discharge to the tidal DE River via a constructed discharge cove in DRBC Water Quality Zone 2. The 0.1 mgd LTP serves the GROWS & Tullytown Sanitary Landfills located in Falls Twp, Bucks Cty, PA. The LTP utilizes best available treatment technology to remove organic & inorganic contaminants, with the exception of TDS. The docket holder has requested that its docket be modified to allow an interim average concentration of up to 15,000 mg/l of TDS in the plant's discharge, an increase from the current limit of 10,000 mg/l as an average. Approx. 3,000 mg/l of TDS is added to the leachate treatment process to facilitate ammonia stripping, metals prescription & sludge conditioning. The proposed LTP discharge is expected to increase background TDS in the estuary by less than 0.5%. An environmental study will be conducted to demonstrate that no adverse impact will occur to aquatic life in the discharge cove before an application to increase the LTP effluent TDS concentration to 19,100 mg/l is considered. No expansion of the treatment facilities or treatment capacity.	Falls Township	Bucks	PA	SE	No	No	B	Other	N/A			11/29/2005 Supplemented: 6/22/2006	2/1/2006
9/27/2006	AS	D-1989-037-2	Mount Airy No. 1, LLC	An application for approval of a ground water withdrawal project to supply up to 9.5 mg/30 days of water to the applicant's distribution system from new Wells Nos. 1 and 2. The project is located in the Long Run Member of the Catskill Formation in the Forest Hills Run Watershed in Paradise Township, Monroe County, Pennsylvania.	Paradise Township	Monroe	PA	NE	No	Yes	B	GWWD	Public		State approval - DRBC to act first.	4/18/2006	6/21/2006

**DELAWARE RIVER BASIN COMMISSION**  
**APPLICATION STATUS PAGE**  
**AS OF SEPTEMBER 15, 2006**

Anticipated Commission Meeting (subject to change - refer to hearing notice)	Project Lead	Docket No.	Applicant	Project Description (As NAR'd - descriptions may change for the hearing notice)	Municipality	County	State	State Regional Office	Located in GWPA?	Located in SPW? (Upper, Middle or Lower)	Type of Renewal or New Project	Type of Project	Type of Water Supply	Items Needed From Applicant	Items Needed From State	Date Application Received	Date of NAR
9/27/2006	AS	D-1991-058 CP-4	Maidencreek Township Authority	An application for approval of a ground water withdrawal project to supply up to 14.39 million gallons per thirty days (mg/30 days) of water to the applicant's public water supply distribution system from new Well No. 5 in the Allentown Formation, and to retain the existing withdrawal from all wells of 22.7 mg/30 days. Well No. 5 is proposed as a redundant source to provide flexibility and reliability in operation of the applicant's public water supply distribution system. The project is located in the Maiden Creek Watershed in Maidencreek Township, Berks County, Pennsylvania.	Maidencreek Township	Berks	PA	SC	No	No	A	GWWD	Public			6/21/2006	8/16/2006
9/27/2006	CP	D-1996-011-2	Degussa Corporation	An application to expand the IWTP's existing discharge to the Delaware River from 0.95 mgd to 1.15 mgd. In conjunction with the expanded discharge, the applicant also has requested a new determination of the IWTP's allowable Total Dissolved Solids limit. The facility, which will continue to serve only the applicant's silica production operations, is located in the City of Chester, Delaware County, Pennsylvania.	City of Chester	Delaware	PA	SE	No	No	B	IWTP	N/A		State approval - DRBC to act first.	3/22/2006	6/21/2006
9/27/2006	PS	D-1996-021-2	Moyer Packing, Rendering, and Beef Facility	An application to re-establish the DRBC's industrial wastewater treatment plant (IWTP) effluent Total Dissolved Solids (TDS) determination of 3,100 mg/l, issued to Moyer Packing Company (MOPAC) in 1985. The TDS determination was later replaced by an osmotic pressure limit contained in the facility's NPDES Permit. Staff has determined that the effluent TDS limit of 3,100 mg/l is protective of aquatic life but not of downstream agricultural uses. Therefore, the applicant has agreed to augment a downstream surface water withdrawal used to irrigate Mainland Golf Course by providing well water as needed, from a proposed new well in the Southeastern Pennsylvania Ground Water Protected Area. The new groundwater withdrawal is being reviewed as a separate project. No increase of MOPAC's 0.75 mgd IWTP capacity is proposed. The IWTP will continue to serve only the MOPAC meat packing and rendering facility, which is located in Franconia Township, Montgomery County, Pennsylvania. IWTP effluent will continue to discharge to Skippack Creek in the Schuylkill River Watershed through the existing outfall.	Franconia Township	Montgomery	PA	SE	Yes - TP	No	B	Other	Industrial		State approval - NPDES Part 1.	9/23/2005	6/21/2006
9/27/2006	AS	D-1998-055-3	Green-Waltz Water Company/ Nestle Waters North America Inc.	An application for approval of a ground water withdrawal project to supply up to 4.8 mg/30 days of water for bulk water supply to the applicant's bottling plant from new Spring Water Borehole B-2, in the Martinsburg Formation. The applicant has requested an increase in total allocation from 11.7 mg/30 days to 16.5 mg/30 days. The project is located in the Waltz Creek Watershed in Washington Township, Northampton County, Pennsylvania.	Washington Township	Northampton	PA	NE	No	Yes	B	GWWD	Bottled Water		State approval - draft construction/operating permit.	3/27/2006	3/30/2006
9/27/2006	AS	D-2000-051 CP-2	Upper Saucon Township	An application for approval of a ground water withdrawal project to supply up to 32.16 million gallons per thirty days (mg/30 days) of water to the docket holder's public supply distribution system through one new well (Well No. CC2) and two existing wells (Wells Nos. CC1 and Abandoned Mine Shaft). The individual allocation for the Abandoned Mine Shaft Well is a reduction from the previous allocation of 30 mg/30 days to 3 mg/30 days; however, the proposed total allocation for all sources is an increase from the previous total allocation for all sources of 30 mg/30 days. The project is located in the Brunswick Formation in the Saucon Creek Watershed in Upper Saucon Township, Lehigh County, Pennsylvania.	Upper Saucon Township	Lehigh	PA	NE	No	Yes	B	GWWD	Public	Confirmation of 5 well replacements and homeowner acknowledgement letters	State approval - DRBC to act first.	1/25/2006	3/30/2006

9/27/2006	CP	D-2002-042-2	Little Washington Wastewater Company	An application for expansion of the White Haven Borough WWTP from 0.45 mgd to 0.6 mgd. The expansion is proposed to accommodate wastewater flows from areas formerly served by the aging Hickory Hills and Ag-Mar WWTPs, in accordance with a Consent Order and Agreement between PADEP and Foster Township. The WWTP will continue to discharge to the Lehigh River, which is tributary to the Lower Delaware River Special Protection Waters. The facility is located in White Haven Borough, Luzerne County, Pennsylvania.	White Haven Borough	Luzerne	PA	NE	No	Yes - Lower	B	WWTP	N/A		State approval - DRBC to act first.	5/2/2006	6/21/2006
9/27/2006	CP	D-2003-025-2	Great Wolf Lodge of the Poconos	An application for the approval of the addition of a 60,000 gallon equalization tank and associated modifications to the existing 90,000 gpd WWTP. The WWTP will continue to discharge to Scot Run, a tributary of the Pocono Creek, which is a tributary of the Brodhead Creek. The Brodhead Creek is a tributary to the Middle Delaware River Special Protection Waters. The facility is located in Pocono Township, Monroe County, Pennsylvania.	Pocono Township	Monroe	PA	NE	No	Yes - Middle	B	WWTP	N/A			7/17/2006	8/16/2006
9/27/2006	PS	D-2006-005 CP-1	Alsace Township	An application to construct a 0.071 mgd WWTP to process domestic wastewater from 201 homes in Alsace Township that are currently served by on-lot septic systems. The extended aeration plant will be constructed at the intersection of Alsace Avenue and Kegerise Road in Alsace Township, Berks County, Pennsylvania. WWTP effluent will be discharged to an unnamed tributary of Little Manatawny Creek in the Schuylkill River Watershed.	Alsace Township	Berks	PA	SC	No	No	C	WWTP	N/A		State approval - DRBC to act first.	2/22/2006	3/30/2006
9/27/2006	PS	D-2006-007 CP-1	Delaware River Joint Toll Bridge Commission	An application for approval of a bridge modification project, located in a recreational area which is included in the DRBC Comprehensive Plan. The US Route 1 Toll Bridge connects the Borough of Morrisville, Bucks County, Pennsylvania with the City of Trenton, Mercer County, New Jersey and is located at the base of DRBC Water Quality Zone 1E. The bridge will be widened at a point where it passes over the Delaware Canal, formerly known as Roosevelt State Park.	Borough of Morrisville (Bucks) and City of Trenton (Mercer)	Bucks and Mercer	PA & NJ	SE	No	No	C	Other	N/A			3/2/2006	3/30/2006
9/27/2006	AS	D-2006-008-1	Green Walk Trout Hatchery	An application for approval of a ground water withdrawal project to supply up to 12.96 mg/30 days of water to the applicant's commercial trout hatchery from existing Wells Nos W-2, W-5 and W-6. The total allocation will be limited to 12.96 mg/30 days. Ground water withdrawals will be used to augment the flow of Greenwalk Creek and provide cold, oxygenated water to the applicant's trout stocking facility. The project is located in the Waltz Creek Watershed in Washington Township, Northampton County, Pennsylvania.	Washington Township	Northampton	PA	NE	No	Yes	C	GWWD	Other			3/27/2006	3/30/2006
9/27/2006	CP	D-2006-019-1	Cove Haven Inc. dba Brookdale on the Lake	An application for the approval of the existing Caesars Brookdale on the Lake Resort's WWTP discharge of 0.084 mgd. The WWTP will continue to discharge to Brookdale Lake, which discharges to Scot Run. Scot Run is a tributary to the Pocono Creek, which is tributary to the Brodhead Creek. The Brodhead Creek is a tributary to the Middle Delaware River Special Protection Waters. The facility is located in Pocono Township, Monroe County, Pennsylvania.	Pocono Township	Monroe	PA	NE	No	Yes - Middle	C	WWTP	N/A			5/26/2006	6/21/2006
9/27/2006	CP	D-2006-020-1	Cove Haven Inc. dba Paradise Stream Resort.	An application for approval of an existing 0.1 mgd discharge from the WWTP that serves the Caesars Paradise Stream Resort. The WWTP will continue to discharge to Paradise Creek, which is a tributary to the Brodhead Creek. The Brodhead Creek is a tributary to the Middle Delaware River Special Protection Waters. The facility is located in Paradise Township, Monroe County, Pennsylvania.	Paradise Township	Monroe	PA	NE	No	Yes - Middle	C	WWTP	N/A			5/26/2006	6/21/2006

12/12/2006	CP	D-1965-052 CP-2	Freeland Borough Municipal Authority	An application for the approval of an extension of service area for the Freeland Borough Municipal Authority's Wastewater Treatment Plant (WWTP). The current WWTP serves Freeland Borough, with the new service area consisting of a portion of Foster Township. The existing WWTP's permitted discharge of 0.75 million gallons per day (mgd) will not be increased as a result of the new service area addition. The WWTP will continue to discharge to Pond Creek, a tributary to the Lehigh River, which is a tributary to the Middle Delaware River Special Protection Waters. The facility is located in Freeland Borough, Luzerne County, Pennsylvania.	Foster Township	Luzerne	PA	NE	No	Yes - Middle	B	WWTP	N/A			6/27/2006	8/16/2006
12/12/2006	CP	D-1967-196-2	Horsehead Corporation	An application for a change of ownership and a docket modification for the discharge of non-contact cooling water. The discharges of approximately 0.15 million gallons per day (mgd) from Outfall 004 and 0.31 mgd from Outfall 005 are associated with recycling electric arc furnace dust and the production of metal powders. The discharges from Outfall 004 and Outfall 005 are to the Aquashicola Creek, a tributary to the Lehigh River. The facility is located in Palmerton Borough, Carbon County, Pennsylvania.	Palmerton Borough	Carbon	PA	NE	No	Yes - Lower	B	IWTP	N/A			2/28/2006	3/30/2006
12/12/2006	CP	D-1989-033 CP-3	Pennsylvania Utility Company	An application for the renewal of a ground water withdrawal project to increase withdrawal from 6.4 mg/30 days to 21.01 mg/30 days to supply the applicant's 2,500 acre Highland Hill development from existing Wells Nos. 1, 2 and 3 in the Towamensing Member of the Catskill Formation. The increased allocation is requested in order to meet projected increases in service area demand. The project is located in the Little Bushkill Creek Watershed in Lehman Township, Pike County, Pennsylvania. This withdrawal project is located within the drainage area to the section of the non-tidal Delaware River known as the Middle Delaware, which is classified as Special Protection Waters.	Lehman Township	Pike	PA	NE	No	Yes - Middle	B	GWWD	Public			7/12/2006	8/16/2006
12/12/2006	CP	D-1992-064 CP-2	Pennsylvania American Water Company	An application for the modification, reconstruction and expansion of an existing wastewater treatment plant to meet regional growth needs and more stringent water quality requirements. The WWTP discharge, located in the West Branch Brandywine Creek in Interstate Water Quality Zone C7, will increase from 3.85 mgd to 7.0 mgd. The facility is located in South Coatesville Borough, Chester County, Pennsylvania.	South Coatesville Borough	Chester	PA	SE	No	No	B	WWTP	N/A			3/31/2006	6/21/2006
12/12/2006	CP	D-1999-062 CP	Easton, City of	An application to increase the applicant's surface water withdrawal allocation from 10 mgd to 12 mgd (360 mg/month) via its intake on the Delaware River at the northeast corner of the City of Easton, Northampton County, Pennsylvania. The proposed expansion is needed to serve increased population in the applicant's existing service area which includes the City of Easton; Wilson, Glendon and West Easton Boroughs; Palmer and Forks Townships; and portions of Williams, Bethlehem and Lower Nazareth Townships; all in Northampton County, Pennsylvania. No additional treatment or storage facilities are proposed.	City of Easton	Northampton	PA	NE	No	Yes	B	SWWD	Public		State approval	1999	12/3/1999

Located in SPW? (Upper, Middle or Lower)	Type of Renewal or New Project	Type of Project	Type of Water Supply	Items Needed From Applicant	Items Needed From State	Date Application Received	Date of NAR
	AS	D-1997-012 CP-3	Perkasie Borough Authority	An application for approval of a ground water withdrawal project to supply up to 11.67 million gallons per 30 days (mg/30 days) of water to the applicant's distribution system from new Well No. 7 in the Brunswick Formation and to retain the existing withdrawal from all wells at 40.2 mg/30 days. Proposed Well No. 7 will be used to replace some of the ground water supply from Perkasie Borough Authority's existing wells that may be lost due to regulatory changes limiting the concentration of arsenic in public drinking water supply. The project is located in the Three Mile Run and East Branch Perkiomen Creek Watersheds in Perkasie Borough, Bucks County, Pennsylvania, within the Southeastern Ground Water Protected Area.	Perkasie Borough	Bucks	PA	SE	Yes - GW	No	B	GWWD	Public	Applicant to submit application to PADEP.	State approval - draft construction permit.	10/25/2004	11/9/2004
	PS	D-1997-019 CP-2	Concord Township Sewer Authority	An application to expand the 1.2 million gallon per day (mgd) Central sewage treatment plant (STP) to process 1.8 mgd, while continuing to provide tertiary treatment prior to discharging to West Branch Chester Creek in non-tidal waters. The Central STP is located off the intersection of Conchester Road (Route 322) and Baltimore Pike (Route 1) in Concord Township, Delaware County, Pennsylvania. The STP will continue primarily to serve Concord Township, but it also will serve small portions of Thornbury and Chester Heights Townships, also in Delaware County, Pennsylvania.	Concord Township	Delaware	PA	SE	No	No	B	WWTP	N/A		State approval - NPDES Part II	8/2/2004	11/9/2004
	PS	D-1999-030 CP-4	Pennsylvania American Water Company	An application for approval of a ground water withdrawal project to supply up to 12.96 mg/30 days of water to the applicant's Glen Alsace public water supply distribution system from new Well G-9A in the Brunswick Formation, and to retain the existing maximum withdrawal from all wells of 50 mg/30 days. The Glen Alsace distribution system also receives water from two existing interconnections—one with the Reading Area Water Authority (45 mg/30 days) and the other with the Mount Penn Water Authority (6 mg/30 days)—and conveys water to the Pennsylvania American Water Company's Douglassville public water supply distribution system in Amity Township, Pennsylvania. The project is located in the Antietam Creek Watershed in Exeter Township, Berks County, Pennsylvania.	Exeter Township	Berks	PA	SC	No		B	GWWD	Public		State approval - construction permit	3/10/2006	6/21/2006
	AS	D-2000-064 CP-2	Quakertown Borough	Ground water withdrawal (Well No. 9) located in Quakertown Borough, Bucks County, PA.	Quakertown Borough	Bucks	PA	SE	Yes			GWWD	Public	Complete application		8/3/2006	
	CP	D-2001-051 CP	Mount Pocono Municipal Authority	An application to expand a 0.4 million gallons per day (mgd) sewage treatment plant (STP) to process 0.6 mgd and continue to provide tertiary level treatment via the sequencing batch reactor process and filtration. The plant will continue to serve Mount Pocono Borough and a portion of Coolbaugh Township both in Monroe County, Pennsylvania. Because the project is located in the drainage area to the Delaware River Basin Commission (DRBC) Special Protection Waters, a nonpoint source pollution control plan is required. STP effluent will continue to discharge to Forest Hills Run in the Paradise Creek Watershed, about 1,000 feet upstream of the State Route 611 bridge in Mount Pocono Borough.	Mount Pocono Borough	Monroe	PA	NE	No	Yes	B	WWTP	N/A		State approval - NPDES Part II	10/1/2001	11/9/2001
	CP	D-2002-023 CP-2	Westfall Township Municipal Authority	An application for the expansion of an existing WWTP (formerly known as the Hunts Landing Plant) to meet regional growth needs. The proposed WWTP expansion will increase the discharge to the main stem Delaware River from 0.3 mgd to 0.82 mgd. The WWTP is located on the west bank of the Delaware River in Water Quality Zone 1C and discharges to Special Protection Waters classified as "Significant Resource Waters" at river mile 252.5. The facility is located in Westfall Township, Pike County, Pennsylvania.	Westfall Township	Pike	PA	NE	No	Yes - Upper/Middle	B	WWTP	N/A	No measurable change analysis and fee	State approval - NPDES Part II	4/4/2006	6/21/2006

DELAWARE RIVER BASIN COMMISSION  
APPLICATION STATUS PAGE  
AS OF SEPTEMBER 15, 2006

Anticipated Commission Meeting (subject to change - refer to hearing notice)	Project Lead	Docket No.	Applicant	Project Description (As NAR'd - descriptions may change for the hearing notice)	Municipality	County	State	State Regional Office	Located in GWPA?	Located in SPW? (Upper, Middle or Lower)	Type of Renewal or New Project	Type of Project	Type of Water Supply	Items Needed From Applicant	Items Needed From State	Date Application Received	Date of NAR
	AS	D-2003-013 CP-3	Buckingham Township	An application for approval of a ground water withdrawal project to supply up to 1.0 mg/30 days of water to the applicant's Smith-Pfeiffer tract distribution system from new Wells FG-1 and FG-2 and to increase the existing withdrawal from all wells from 41 mg/30 days to 42 mg/30 days in order to meet increased service area demand. The project is located in the Brunswick Formation in the Robin Run Watershed in Buckingham Township, Bucks County, Pennsylvania and is located in the Southeastern Pennsylvania Ground Water Protected Area.	Buckingham Township	Bucks	PA	NE	Yes	No	B	GWWD	Public		State approval	5/15/2006	6/21/2006
	AS	D-2004-004 CP-2	Audubon Water Company	An application for the renewal of a ground water withdrawal project to continue withdrawal of 49.79 mg/30 days to supply the applicant's public water supply distribution system from 19 existing wells and new replacement Well AWC-15 in the Lockatong Formation. The project is located in the Perkiomen Creek Watershed in Lower Providence Township, Montgomery County, Pennsylvania, within the Southeastern Pennsylvania Ground Water Protected Area.	Lower Providence Township	Montgomery	PA	SE	Yes	No	B	GWWD	Public		State approval.	4/18/2006	6/21/2006
	PS	D-2005-007 CP-1	East Vincent Municipal Authority	An application to rerate a 48,800 gallon per day (gpd) sewage treatment plant (STP) to process a maximum monthly flow of 52,800 gpd, while continuing to provide tertiary treatment. The project will continue to serve flows from the built-out residential development known as Bartons Meadows in East Vincent Township, Chester County, Pennsylvania. The additional 4,000 gpd is needed to handle wet weather related flows due to inflow and infiltration. Following ultraviolet light disinfection, STP effluent will continue to be discharged to subsurface seepage beds in the drainage area of French Creek, which is designated as a Scenic River in the DRBC Comprehensive Plan. The project is also situated in the DRBC Southeastern Pennsylvania Ground Water Protected Area and the Schuylkill River Watershed. The STP is located off Sheeder Road just north of its intersection with Pughtown Road.	East Vincent Township	Chester	PA	SE	Yes - TP	No	C	WWTP	N/A		State approval - NPDES Part I.	2/16/2005	3/25/2005

	AS	D-2005-018 CP-1	Kelly Group, The	An application for approval of a ground water withdrawal project to supply up to 5.61 million gallons per thirty days (mg/30 days) of water to the applicant's public water supply distribution system from new Wells Nos. 8, 10, 11, 12 and 13 in the Granitic Gneiss Formation. The project is located in the Swamp Creek Watershed in Washington Township, Berks County, Pennsylvania.	Washington Township	Berks	PA	SC	No	No	C	GWWD	Public		State approval - public water supply.		6/10/2005
	PS	D-2005-024-1	Mainland Golf Course, Inc.	An application for an allocation of 0.1 mgd (3 mg/30 days) of surface water from Skippack Creek in the Perkiomen Creek Watershed for use as irrigation water supply at Mainland Golf Course, which is located one-half mile southwest of the intersection of Upper Mainland Road and State Route 63 in Lower Salford Township, Montgomery County, Pennsylvania. The surface water use records for Mainland Golf Course indicate that withdrawals for six months during the last ten-year period exceeded 3 million gallons. Mainland Golf Course has since made operational adjustments at its 110-acre, 18-hole golf course to prevent future exceedances. Water quality analysis indicates elevated concentrations of Total Dissolved Solids, sufficient to impair the water supply's use for irrigation purposes. An interagency evaluation of this matter is underway. The golf course is located in the Southeastern Pennsylvania Ground Water Protected Area, but no ground water withdrawal wells are operated at the site.	Lower Salford Township	Montgomery	PA	SE	Yes - SW		C	SWWD	Recreation			9/20/2005	11/4/2005
